

Best Practice – I

1. Title of practices:

Seed Ball

2. Objectives of the practice:

- To make awareness of Environment among people.
- To make Environment Greenery.
- To prepare students for creating Seed Ball.
- To reduce soil erosion.

3. The Context:

Seed balls, also known as earth balls consist of seeds rolled within a ball of clay and other matter to assist germination. They are then thrown into hill area in order to grow plants. These seed balls which reduce the soil erosion. In hill areas we can't plant trees easily so through these seed balls, we can grow plant in this area.

4. The practices:

On 22th August 2023, students made the seed ball on the college campus. More than hundred seed balls were made. On 23th, to 24th August 2023 the seed ball was kept under sunlight for drying. In this year we kept more days for the soking of seed ball due to high rain fall these days.

On 14th October 2023, all these seed balls were thrown at Deolai Hilly sai tekdi area situated in Chhatrapati Sambhajinagar. This practice not only helps to make environmental awareness among people but also maintains balance of environment and increase the number of trees.

5. Evidence of Success:

On 14th October 2023, we took geotag of plants growing last academic year that is 2023-2024. All these evidences were stored and uploaded our college websites.

6. Problems Encountered and Resources required:

We thrown more than hundred seed balls on Sai Tekdi Deolai some of the seeds were eaten by wild animals like rabbit, peacock, hen etc. Irregular of rain stop the growth of seed balls.
